

FOOD

SMART TIPS *on* **SAVING WATER**

Accumulate a meal's worth of dishes and pots to minimise unnecessary washing of dishes (but still considering good hygiene practice).

When washing dishes -
fill the basin

(don't let the water run)

Scrape dishes before washing **(don't rinse)**.

4

Defrost frozen food by taking it out of the freezer hours before it is required, instead of using running water to defrost it.

5

If necessary, use the **microwave** to defrost the frozen food.

6

Samp and other hard foods can be soaked hours before cooking.
